WORK EXPERIENCE

AI-Assisted Website Development

FREELANCE / PERSONAL

Designed and delivered website layouts and landing pages leveraging AI-assisted development tools, emphasising responsive UI design and accelerated development workflows.

- Developed mobile-friendly landing pages with clean, accessible layouts
- Used AI tools to rapidly prototype and iterate on UI design concepts
- Applied HTML, CSS, and JavaScript to produce cross-browser compatible products

PROJECTS

TypeLearn — Programming Vocabulary Typing Trainer

[Live Demo](#)

A web-based typing practice platform that improves typing speed while teaching programming-related vocabulary and spellings. Calculates WPM and highlights mistakes in real time.
